

Fleet CRM Module

(Customer Relationship Management)

MANAGE MULTIPLE FLEETS.

With Collective Data's Fleet Service Management module, organizations are able to manage not only their own fleet, but others as well.

This option is perfect for fleet service providers or organizations that would like to accommodate external fleet maintenance work into their own repair shops.

- Track and manage all of the data for individual clients you service.
- Allow customers to have access to their individual data if you desire. (reports, repair histories, ect.)
- Know how much it is costing to service each individual customer.
- Keep track of markups and see your true profit margin for each customer.
- Set contracted rates for specific clients.
- Much more.
