collectiveFleet™ for Utilities

Fleet & Asset Management Software

Focused on the needs of Electric Utility, Utility Contractor, and Cable/Telecom Providers.

- Improve all aspects of preventative maintenance resulting in reduced downtime and increased equipment life.
- Track more information related to all of your mobile assets: projects, job sites, equipment components, tool assignments, and mobile inventory.
- Manage customer information for improved reporting, accountability, and invoicing.
- Gain a flexible and powerful reporting system to deliver all the information needed for better decision making.

ABOUT THE TECHNOLOGY

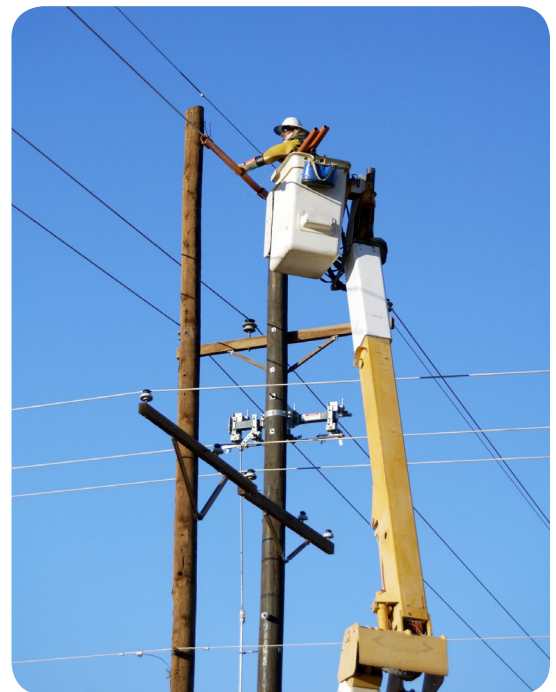

Built on it's Core™ framework, Collective Data software is the most flexible and configurable fleet & asset management solution on the market. We understand that each organization has different tracking needs, and we are able to deliver a solution tailored to what you need.

The ultimate asset management solution for Utilities looking to manage **more**, with *less*.

The diverse mix of vehicles, mounted equipment and devices, generators, tool kits, employees, and other mobile assets are what makes a managing a Utility operation challenging without having detailed information for decision making.

Collective Data understands that today's Utilities are looking for ways to reduce costs, improve efficiency, and improve service to customers. That's why we've worked closely with organizations like yourself to develop **collectiveFleet for Utilities**, an enterprise fleet and asset management software solution to help you get more control over your operational assets.

All members of the organization from equipment mechanics, tool clerks, drivers, to supervisors, benefit from **collectiveFleet for Utilities**. Spend less time inputting and looking for data, and spend more time getting the job done.

driving fleets forward.

collectiveFleet™ for Utilities

Benefits:

- Manage and track all of your assets with improved efficiency.
- One software solution that delivers the data you need to manage Utility vehicles, equipment components, up fitting costs, disassembly, and rental equipment.
- Reduce downtime, improve service, and extend the useful life of mission-critical assets through better preventative maintenance.
- Improve how you manage tools with an efficient check-out/check-in process. Know where the tool is, who's been using it, the condition, and who had the part for how long.
- Manage and track the efforts of equipment, assets, tools, parts, and employee labor as applied to projects and job sites.
- Know where your resources are located and how much it is costing to operate those resources.

SUPERIOR SUPPORT

We have a 97% positive customer support rating from our annual customer satisfaction surveys, proving that Collective Data is committed to helping you achieve your goals.

CUSTOMER COMMENT

"As a Regional Service Provider for DISH Network, we rely on outside companies for the actual maintenance work on our trucks. Collective Data has been very beneficial for us to stay on top of scheduling and logging all the maintenance work done for each of our 80+ vehicles. The software is a great tool that allows our company to more efficiently track our vehicle maintenance and repair work."
