

# collectiveFleet Solutions

Better Data. Better Decisions.

## A Complete Fleet Management Software System

With collectiveFleet, organizations gain the comprehensive software system they need to manage fleet maintenance, parts inventory, work orders, scheduling, fuel management, and much more.

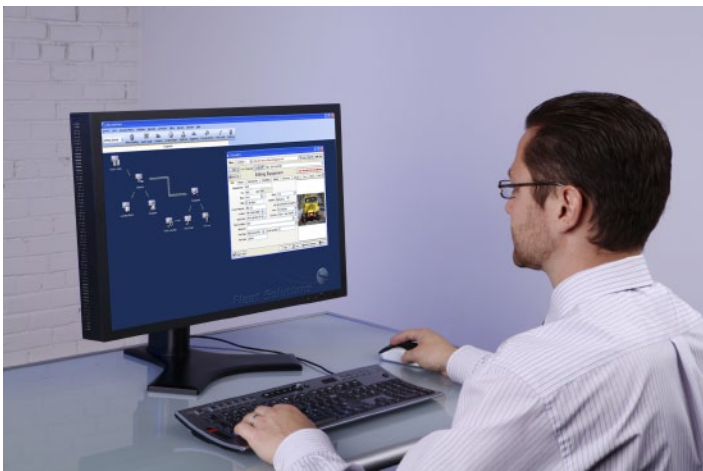

The system is designed to improve fleet operations by helping to decrease maintenance and repair costs, increase vehicle utilization, ensure regulatory compliance, and give an organization a comprehensive *asset management* tool.

With over 100+ stock reports and flexible reporting options, fleet managers gain access to an array of information they need to make critical decisions affecting:

- Fleet right-sizing
- Budgets
- Risk management
- Purchase & disposals
- Green initiatives
- Much more.

At the heart of the system is the functionality designed to increase equipment dependability through proper maintenance and better tracking of fleet vehicles.

- Work order management
- Preventative maintenance scheduling
- Maintenance requests
- Track costs-per-meter
- Much more.

## A few of the many *Benefits & Features*

- Complete vehicle, equipment, and parts management
- Life-cycle costing
- Over 100+ stock reports, as well as a complete custom report engine
- Accident & claims tracking
- Email notification system for upcoming maintenance, scheduled work, ect
- Extend the life of vehicles and equipment through a more efficient maintenance process.
- Control spending and meet cost expectations.
- Increase warranty recovery on parts and equipment.
- Much more

## Integrated Solutions

Collective Data's fleet management software has the flexibility to bring in 3rd party data as a part of the system. This technology can help lead you even further in reaching your fleet management goals. A few of our integration partners are below:

... and more!

Take your fleet to a whole new level of efficiency and productivity with **collectiveFleet**.
